ABSTRACT **OBJECTIVE** To provide standardized guidance for the homogenization construction and management of pharmaceutical care in urban medical groups. **METHODS** This consensus was jointly initiated by the Therapeutic Drug Monitoring Professional Committee of the Chinese Pharmacological Society and the Expert Committee on Precision Clinical Medication of the Guangdong Pharmaceutical Association. Led by Guangzhou Red Cross Hospital, a drafting group of 7 members and an expert group of 36 members were organized. The outline of the *Expert Consensus on Homogeneous Construction and Management of Pharmaceutical Care in Urban Medical Groups* (hereinafter referred to as the “Consensus”) was discussed and finalized using the nominal group technique, and a preliminary draft was formed. The Delphi method was used for online correspondence review, and 12 external experts were invited for evaluation. After analyzing and revising expert opinions, the final Consensus was formed.

and revising expert opinions, the final Consensus was formed.

RESULTS & CONCLUSIONS This Consensus defines the position setting and appointment procedures for the chief pharmacist, and establishes a three-tier professional guidance network of “chief pharmacist-regional/specialist pharmacist-pharmaceutical liaison of member institutions”. It formulates unified management standards for the drug supply catalog, establishes a full-process homogenization mechanism for
